

Ghadah Alsubaie

Android developer and Ui designer

Riyadh, SA | (966)554106774 | ghadahalsubaie@gmail.com | linkedin.com/in/ghadah-alsubaie-9ba05628b

Objective

I am seeking a cooperative training opportunity in the field of Computer Science where I can apply my skills and knowledge in programming and user interface design. I aim to enhance my expertise in Android application development and work on technical projects that improve user experience.

Education

2021/08 – present **Bachelor of Science in Computer Sciences**
Riyadh, SA *Princess Nourah bint Abdulrahman university*
GPA : 4.73 out of 5

Skills

Soft skills:

Teamwork, problem-solving, critical thinking, creativity, research, adaptability

Technical skills

Java, C#, SQL, LINQ,
Android Studio (Java), Power BI, Figma, Microsoft Office, Visual Studio, SQL Server

Projects

Codeta

Android Application

- Built an educational Android app using Java and Android Studio to help users learn programming language through video and quizzes.
- Designed a user-friendly interface and easy to navigate.
- Integrated SQLite for local data storage.

Supermarket system

C# application

- Developed a supermarket management system using C#, LINQ, and SQL Server for shopping operations.
- Designed a user-friendly interface with Microsoft Visual Studio that enhances user experience.
- Implement two perspectives within the system (customer view, manager view).

Pawssible

Human-computer interaction

- Designed a pet food delivery app prototype in Figma,
- Applied fundamental UI principles to enhance the user experience, ensuring ease of navigation.
- Conducted usability testing to gather user feedback to improve the design.

Courses

- Data visualisation with Power BI 
- Database Foundations
