SUMMARY

Senior Information Technology student at Imam Muhammad ibn Saud Islamic University, I am interested in UX/UI design, IT project management, Analytics & AI, and Business Intelligence (BI). I am seeking a training role in a fast-paced environment where I can apply my skills to support team and business objectives, continuously learning and adapting to new technologies and procedures. My goal is to join a company where I can contribute effectively, enhancing productivity and reputation while gaining hands-on experience in real-world projects.

Driven by a commitment to technology and innovation, I actively participate in both practical projects and volunteer activities to expand my skill set. I am eager to leverage my expertise to make a meaningful impact in the technology field while pursuing continuous professional growth.
