PROFILE

I am a senior Information Technology student at Princess Nourah Bint Abdulrahman University (PNU). I have a strong passion for learning, personal development, and always seeking new opportunities. During my time at university, I worked on more than 10 projects in various fields, and I was the leader in most of them. My interests lie in project management, with exposure to various fields of computing such as application development, data analysis, and machine learning. Additionally, I value communication and have expanded my network through active participation in numerous university activities and by joining several university clubs. I am also a member of the Saudi Council of Engineers (SCE). I thrive on challenges that allow me to grow both personally and professionally.

EDUCATION

Bachelor of Information Technology <i>Princess Nourah bint Abdulrahman University PNU</i>	08-2021 – present Riyadh, Saudi Arabia
---	---

PROJECTS

CAReful Clean <i>Project in Human Computer Interaction</i>	02-2024 – 05-2024
--	-------------------

The project was focused on **Human-Computer Interaction (HCI)**, where I worked extensively with user interfaces and their design. Through this project, I gained hands-on experience in creating intuitive and user-friendly interfaces, ensuring a seamless interaction between users and technology.

PNU Amenity <i>Project in Project Management</i>	02-2024 – 04-2024
--	-------------------

The project was related to our **Project Management** course, where we took the existing **PNU Students** university app and created an improved version of it. Through this project, I became familiar with the fundamentals of project management, including defining the project scope, identifying stakeholders, and managing time, cost, and risks. This hands-on experience gave me a deeper understanding of how these elements come together to ensure a successful project outcome.

PureStyle <i>Software engineering project</i>	09-2023 – 12-2023
---	-------------------

The project was part of our **Software Engineering** course, where I gained valuable insights into the software development process. I learned key aspects of software engineering, including gathering and analyzing requirements, as well as creating UML diagrams, case diagrams, class diagrams, and other relevant diagrams. This project provided me with hands-on experience in applying structured methodologies to design and develop software systems effectively.
