SUMMARY

A computer science student in my final year at Princess Nourah Bint Abdulrahman University, passionate about artificial intelligence and dedicated to enhancing my skills in the field. I possess strong analytical and programming abilities, and I strive for excellence by participating in hackathons and joining technical workshops. I aim to leverage my academic knowledge and practical experiences to develop innovative solutions that improve performance and productivity in various work environments.

EDUCATION

Princess Nourah Bint Abdulrahman University | Saudi Arabia

Bachelor's degree in computer science | 4.10 Out of 5 | 2021 – 2025.

- Developed a responsive airline website interface focusing on user-friendly flight booking and reservation management with innovative features such as ticket exchange. The interface design was created using Figma.
- Created a C++ supermarket management system with efficient inventory tracking and automated billing features.

Courses

- Oracle in databases SQL.
- Python for Data Science, AI & Development from IBM
- AI For Everyone from DeepLearning.AI
- Data Science Specialization by Johns Hopkins University
- Introduction to Cyber Attacks by New York University

OTHER

● Technical Skills:

- Microsoft Office.
- Report Writing.
- Familiar with SQL programs.
- Experienced in using NetBeans and Python.
- Proficient in a wide range of computer programs across various platforms.
- Highly capable of quickly learning new computer systems and software.
- Experienced in several programming languages, including Java and C
- Project Management.

● Soft Skills:

- Time Management.
- Critical Thinking.
- Ability to work independently and in a team environment.
- Work Efficiently.
- Continuous Learning.
- Flexibility and Adaptability.
- Communication skills.

● Languages: Arabic, English.
