Projects

Information Retrieval System
Developed an Information Retrieval System that enables users to input a search query and returns a ranked list of relevant documents. This was done in the Data Mining and Information Retrieval course.

Twitter Sentiment Analysis
Completed a project on analyzing Twitter sentiment using Natural Language Processing (NLP) techniques to determine the emotions behind tweets.

Predicting Students Marks
Created a model using Linear Regression to predict student exam scores based on study hours. This was done as part of a Deep Learning course.
