## About me

---

As a senior Computer Information Systems student at King Saud University, I have developed a strong foundation in web development, database management, and data analysis. My coursework and projects have equipped me with the technical expertise and problem-solving abilities needed in the field. I am keen to find a cooperative training position where I can apply my knowledge and skills, contribute to innovative projects, and grow within a professional environment.

## Education

---

Bachelor's degree in Computer Information Systems at King Saud University.

**GPA: 4.72/5**

## Graduation Project

---

Built an app called 'Eventizer' that helps users to find event planners, order services from them, and manage all event details through a single platform, simplifying the event planning process.

## Experience

---

### Smart Methods Company.

Summer 2020

Worked on projects in IoT, AI, mechanical engineering, and electrical power. Developed and integrated applications and gained hands-on experience with software development and system integration.

## Certificates

---

- |   |                  |
|---|------------------|
| • Fuel program in data analysis, Coursera.<br>Includes:<br>— Foundations: Data, Data, Everywhere<br>— Ask Questions to Make Data-Driven Decisions<br>— Prepare Data for Exploration (June 23, 2022) | October 24, 2023 |
| • Virtual Work Experience, Microsoft.   | August 23, 2023  |
