SUMMARY

With a Bachelor's Degree in Information Technology, I bring a strong foundation in technology principles to my role as a Systems Analyst. My expertise spans system design, data management, and technical problem-solving, equipping me to effectively analyze and optimize organizational IT systems. Skilled in identifying system requirements and translating business needs into efficient solutions, I support teams by ensuring seamless functionality and integration. My attention to detail and ability to troubleshoot complex issues make me an invaluable asset in enhancing system performance and driving technological innovation.

EDUCATION

Imam Mohammad Ibn Saud Islamic University | Saudi Arabia

Bachelor Degree of Information Technology | 4.70/5 | 2020 - Present

- Develop foundational knowledge in computer systems, programming, and network architecture.
- Equip students with skills to effectively design, implement, and manage IT solutions.
- Focus on problem-solving techniques to address technical challenges across industries.
- Enhance critical thinking abilities for analyzing complex IT issues and solutions.
- Prepare students to manage data securely, ensuring integrity and privacy standards.
- Cultivate teamwork and communication skills essential for collaborative technology projects.
- Provide hands-on experience with emerging technologies like AI, cloud, and cybersecurity.
- Build a strong foundation for adapting to evolving trends in information technology.
