CAREER  
OBJECTIVES

Research and Development Engineer | 2030–2035

Aspiring cybersecurity professional committed to securing digital environments through proactive threat detection, risk assessment, and continuous learning. Highly adaptable, with strong teamwork and problem-solving skills, effective communication, and the ability to perform well under pressure while meeting tight deadlines.

ACADEMIC  
PROJECTS

Graduation Project – DDoS Detection  
Developed and implemented mechanisms for detecting Distributed Denial of Service (DDoS) attacks, applying various traffic analysis techniques.

Denial of Service (DoS) Attacks  
Worked on practical aspects of DoS attacks, analyzing attack strategies and exploring effective mitigation techniques.

Web Development  
Developed several web pages, focusing on security practices, optimization, and user interface design.

EDUCATION

Imam Mohammad Ibn Saud Islamic University  
Diploma in Cybersecurity  
GPA: 4.67

SKILLS

- Cybersecurity: DDoS and DoS attack detection, vulnerability assessment, incident response, threat analysis
- Networking: TCP/IP, Firewalls, VPNs, Network Security Monitoring
- Web Development: HTML, CSS, JavaScript, Web Application Security
- Programming & Scripting: Python, Java, Bash scripting
- Soft Skills: Teamwork, communication, problem-solving
