📍 Jeddah ,Saudi Arabia

Profile

I'm a data science bachelor's student. I have a strong desire to use statistics to change the world. I like to analyze data to uncover significant patterns.I can't wait to put these abilities to use in solving actual issues.

Education

2020/08 – present **Bachelor of Data Science**
Jeddah University

Projects

Graduation Project

Sentiment Analysis for Jeddah Restaurants

The project focuses on **Sentiment Analysis for Jeddah Restaurants**, utilizing customer reviews extracted from **Google Maps**. The objective is to analyze and classify customer feedback as positive, negative, or neutral to provide insights into customer satisfaction.

The data was collected directly from Google Maps reviews, which were then preprocessed for analysis. Using **Natural Language Processing (NLP)** techniques and machine learning algorithms, the project aims to highlight trends in customer sentiments. The results are intended to help restaurant owners improve their services and enhance the overall dining experience in Jeddah

Courses

2024 **Python for Data Science, AI & Development**
Google
