Data Science student at Umm Al-Qura University, I possess knowledge in data analysis, cleaning, modeling, and visualization. I am proficient in Python and SQL programming languages and skilled in utilizing a variety of data science tools and techniques. With a proven track record of applying these skills in academic projects, I am eager to further develop my expertise through practical experience by seizing cooperative training opportunities.

EXPERIENCE

DATA ANALYSIS PROJECT – DATA ANALYSIS COURSE

Role: Data Visualization Specialist

RESPONSIBILITIES:

- Designed and developed interactive visualizations to represent and analyze data.
- Utilized advanced tools and techniques to transform complex data into easily understandable visual formats.
- Collaborated with the academic team to ensure visualizations aligned with the project's educational objectives

DATA MODELING PROJECT – DATA MODELING COURSE

Role: Data Cleaning Specialist

RESPONSIBILITIES:

- Processed and cleaned large datasets to ensure accuracy and quality.
- Addressed missing values, outliers, and duplicates to maintain data integrity.
- Worked closely with team members to ensure data met modeling requirements.
- Prepared data for modeling using advanced cleaning techniques.

EDUCATION

BS IN DATA SCIENCE, UMM AL-QURA UNIVERSITY, MECCA, MAKKA

College of Computers

SEPTEMBER [2022] - JUNE [2026]

- Activities and societies: Member of the Student Club of the Faculty of Computers

SKILLS

- Data Analysis
- Data Modeling
- Data Visualization
- Data cleaning
- Python
- SQL

Languages

- Arabic
- English (Intermediate Level)
