About Me

I am a computer science student who is passionate and innovative in the realm of programming and information technology. I aim to improve my software design and problem-solving skills. I love to delve into the latest technologies and apply them to real-world projects. I am keen to expand my knowledge in various technical fields, especially in the field of information security. I strive to excel in my professional and personal fields while contributing to the growth of the technology community, and I am confident that my skills and commitment will have a positive impact on the common goals.

Education

Bachelor of Computer Science

- **University:** Prince Sattam bin Abdulaziz University
- **Major:** Computer Science
- **GPA:** 4.51 out of 5

University Project

- **Project title:** Innovative Website Development
- **Description:** The project aims to develop an e-commerce system while integrating artificial intelligence features to improve the shopping experience and provide advanced search mechanisms and quick product access. The system includes the ability to search through images and make suggestions based on user preferences.
- **Technologies used:** HTML, CSS, Python, Bootstrap, JavaScript, PHP, Laravel, DenseNet201, TensorFlow, OpenCV
