ABOUT ME

I am a dedicated Management Information Systems student with a strong foundation in data analysis, business strategies, and programming. Passionate about leveraging technology to solve business challenges, I excel in analyzing systems, managing databases. My coursework and projects have equipped me with skills in [MS Excel, SQL, Python, Cisco Packet Tracer, Tableau] and an understanding of how technology aligns with organizational goals. I am eager to apply my knowledge in real-world environments to contribute to innovation and efficiency in business processes.
