SUMMARY

As a senior Information Systems student with a technical background and an ECBA certification from IIBA in Business Analysis, I am seeking a cooperative training opportunity. I aim to leverage and enhance my academic knowledge and skills while demonstrating my strong sense of responsibility and commitment to gaining practical experience.

EDUCATION

Bachelor's of Science In Information System (CIS)

Imam Muhammad Ibn Saud Islamic University (IMSIU) | 4.65 Out of 5

Aug 2020 – Current

GRADUATION PROJECT

Haqel Project: is a B2B platform aimed at improving the efficiency of the fruit and vegetable supply chain in Saudi Arabia by connecting farmers, wholesalers, and retailers. By utilizing predictive pricing to enhance price transparency, the project promotes digital transformation and supports local food security and economic diversification.

PROJECTS

Business Analysis project

- In this project, we concentrate on business analysis by outlining the scope, business requirements, stakeholder analysis, user requirements, and software requirements. We also incorporate relevant modeling diagrams, such as use case diagrams

Decision Support System project

- In this project, we analyzed a collection of email messages categorized as spam or not spam to develop a classification model that accurately detects spam emails, utilizing Excel and RapidMiner tools.

Business Intelligence project

- In this project, we utilized business intelligence tools and algorithms to improve processes and tackle challenges. The main goal is to analyze a dataset and apply BI techniques, including Power BI and Tableau, to this data.

Web Development project

- In this project, we created a comprehensive beauty products system utilizing PHP, JavaScript, HTML, CSS, and MySQL. This system allows users to browse, search, and manage beauty products efficiently, ensuring a seamless user experience.
