EDUCATION

Computer Science and Engineering

University of Hafr AlBatin

2022 - Present

Bachelor's degree

GPA : 3.978-4

Relevant Coursework

- Programming & Software Development: Data Structures, Database Systems
- Computer Systems & Hardware: Digital Logic Circuit Design, Computer Architecture & Assembly, Electric Circuits, Electronics
- Fundamentals of Computer Networks

Projects

- Developed a shopping list management system (Java)
- Designed UI and UML diagrams for a management system.
- BCD Decoder Circuit (LogicWork 5) – Implemented and simulated a logic circuit.

CERTIFICATES

Vulnerability Detection Course

University of Hafar Al-Batin

Cyberthon , Hafar Al-Batin University

University of Hafar Al-Batin

Workshop on the Basics of Kali Linux

University of Hafar Al-Batin

Web Penetration Testing Course

University of Hafar Al-Batin

Cybersecurity Principles Course

University of Hafar Al-Batin

Digital Forensic Analysis Course

University of Hafar Al-Batin

ios app development

Satr Platform

Introduction to Technical Projects Course

Satr Platform

SUMMARY

Computer Science and Engineering student with a strong foundation in programming, data structures, and software development. Passionate about AI, web development, and data analysis. Seeking a COOP opportunity to gain hands-on experience and enhance technical and teamwork skills.

SKILLS

Programming Language -Java

Microsoft Office -Word-Excell-Power
Point-Power BI

Databases - MYSQL- SQL - Queries

Time Management and Organization

Assembly Language and Simulation - MARS

Network Analysis - Wireshark

Data Analysis - SPSS

Operating Systems - Linux -Windows-MacOS

Creativity and Innovation

Adaptability and Learning Agility

Problem Solving and Critical Thinking

Object-Oriented Programming (OOP)

Communication and Teamwork Skills

LANGUAGES

Arabic

English
