### Disclaimer

These results are based on the Comprehensive Economic Survey conducted in 2023, through which a full count of establishments was carried out, the establishment frame was updated, and the level of coverage was enhanced. Accordingly, the results are not comparable to those of previous years, until GASTAT finalizes the updates to the results up to the year 2019.

### Methodology and Quality

Small and medium enterprises statistics are among the most prominent periodic economic statistics conducted annually, as they provide a set of key economic indicators that help in understanding the structure of small and medium enterprises.

These statistics aim to provide indicators related to operating revenues, operating expenditures, and compensation of employees, in accordance with the International Standard Industrial Classification of All Economic Activities (ISIC4).
